- Q.22. Read the following passage carefully and answer the question given below it. 3
- All of us need food to live. (We need food to grow and to remain strong and healthy) Food gives us energy to work and play. We get all our food from plants and animals. We must eat different types of food. Each type of food plays an important role in our body. There are three main types of food that we eat. Energy giving food, body building food and protective food. The food items like wheat, rice, butter, milk, and sugar give us energy to work. These food items are called energy giving foods. Milk, pulses, eggs, grains help us to grow and build our bodies so these food items are called body building foods. Fruits and vegetables protect us from diseases. So, they are called protective foods.

- (i) Why do we all need food?
- (ii) Where do we get all our food from?
- (iii) What are energy giving foods?
